Lecture 2: Word Processing (Contd..)

MAIL MERGE (GREETING LINE)

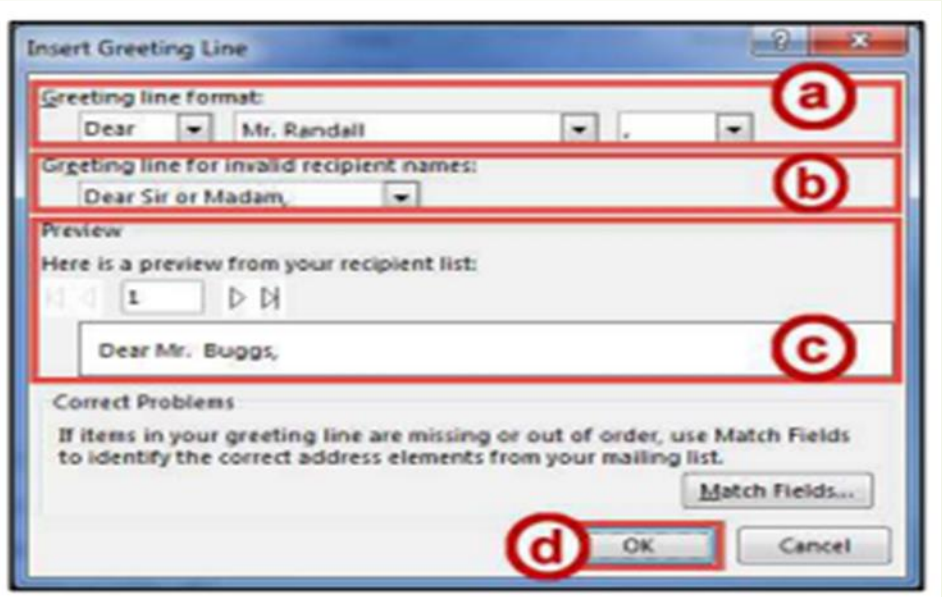

Figure 35 Inert Greeting Line

MAIL MERGE

- Click More items.
  - **Fields** - Insert specific fields into your letter, one field at a time.
  - **Insert** - Insert the selected field.
  - Click the **Close** button.
- In the **Mail Merge pane**, click **Next: Preview your letters**.
- In the **Mail Merge pane** under **Preview your letters**, you can **preview** all letters before completing your mail merge.
- Click Next: **Complete the merge**.

MAIL MERGE

- In the **Mail Merge pane** under **Merge**, click **Print.**
- In the **Merge to Printer dialog box**, select your option to ***Print Records***.
- Click the **OK** button.
- The **Print window** will open. Adjust your settings for your printer and print your documents.

GRAPHICS

- The use of graphics will improve your documents and allow you to provide the readers with more information in the form of a visual aid.
- Some of the graphics features in Word include: Inserting Pictures, Inserting Shapes, Inserting Shapes, SmartArt, Chart.

INSERTING SHAPES

- The following steps explains how to insert different predefined shapes into your Word document:
  1. Click the **Insert tab**.
  2. In the **Illustrations group**, click on the **Shapes button**.
  3. A **drop-down window** will appear with a library of shapes to choose. Click on a **shape** to select it.
  4. Your cursor will change to a **crosshair** and you will be ready to insert your selected shape.
  5. To draw your selected shape within your document, **hold the left mouse button** and **drag the cursor** to draw your shape.
  6. Release the left mouse button when you are finished drawing your shape. The shape will be added to your document.

INSERTING SHAPES

Modifying Shapes with Drawing Tools

- You can modify shapes in a number of ways. Below are some of the ways that shapes can be changed:

I. **Re-sizing a Shape**

- Re-sizing a shape is similar to re-sizing a graphic (picture or clip art).

II. **Re-Shaping**

- After clicking on a shape, the shaping handles will appear (along with the sizing handles) as yellow squares. A two-dimensional shape can be altered by clicking and dragging the yellow squares to alter a certain aspect of the shape.

INSERTING SHAPES

Accessing the Drawing Tools – Format Tab

- Shapes will have their own set of editing tools accessible by a context sensitive tab on the Ribbon. To access this tab, **click on a shape** in your document and the **Drawing Tools – Format tab** will appear in the Ribbon.

Adding Styles to your Shapes

- Shapes have preset styles under the **Drawing Tools – Format tab** that you can use to **alter the color, border,** and **any special effects** to the shape. Steps to apply a style to a shape:
  1. In the **Shape Styles group**, click on **a Style** of your choice.
  2. Click **the drop-down arrow** to access additional styles.

INSERTING SHAPES

3. To access additional formatting options, click the **dialog launcher** in the lower-right corner of the **Shape Styles grouping**.
4. The **Format Shape options** will appear to the right of your document.

Applying Color to Your Shape: Steps to add/change the color of a shape:

1. In **the Shape Styles group**, click the drop-down arrow for **Shape Fill**.
2. Select a **color** to apply it to your shape.

Changing the Shape Outline: Steps to change the Shape Outline:

1. In **the Shape Styles group**, click the drop-down arrow for **Shape Outline**.
2. **A drop-down menu** will appear. From here you **can alter the color, thickness (weight)** of the outline, and **add dashes**.

INSERTING SHAPES

Switching Shapes: Steps to switch shapes in a document:

1. In the **Insert Shapes group**, click **the Edit Shape icon**. A **drop-down menu** will appear.
2. Click **Change Shape**. A list of shapes will appear.
3. Select a **shape** from the options available to switch it with your selected shape.

Add Text to a Shape: To add text to your shape, simply **click on your shape** to select it and begin typing. Your text will automatically fill into the shape. Adjust your shape as needed to make additional space for your text. Text can be formatted like regular text in the document.

INSERTING SMARTART

Inserting SmartArt: SmartArt graphics provide a visual representation of information or ideas. Steps to insert SmartArt graphics into your Word document:

1. Click the **Insert tab**.
2. In the **Illustrations group**, click on the **SmartArt button**.
3. The **Choose a SmartArt Graphic window** will open. Select a **SmartArt graphic** from the list.
4. Click the **OK** button.
5. The selected **SmartArt graphic** will be inserted into your Word document.

INSERTING SMARTART

Editing SmartArt Graphics: Once inserted into your Word document, your SmartArt can be **edited** and **customized** by accessing the **SmartArt Tools tab**. Steps on how to access the Design and Format tabs:

1. Click on **the image** of your SmartArt graphic. The **SmartArt Tools contextual tab** will appear at the top of the screen.
    a. To alter aspects of the SmartArt design, click **the Design tab**. **(The SmartArt Tools: Design tab contains tools that will allow you to alter the layout of the selected design, change colors, and select from preset styles).**
    b. To format aspects of the SmartArt graphic, click **the Format tab**. (**The SmartArt Tools: Format tab contains tools that will allow you to change the shape of your SmartArt, add preset styles to the shape and words, and choose individual aspects of the SmartArt graphic to modify (e.g. changing the shape fill or outline)).**

INSERTING CHARTS

Inserting Charts: Adding charts to your word document can help readers visualize a relationship among sets of data. Steps on how to add Charts to your word document.

1. Click the **Insert tab**.
2. In the **Illustrations group**, click on the **Chart button**.
3. The **Insert Chart window** will appear. Click on the chart you wish to use.
4. Click the **OK** button.
5. The selected chart will be inserted into your document.

Note: Hover your mouse over the picture of a graph for an enlarged preview of the chart.

INSERTING CHARTS

Editing your Chart

- Once inserted into your Word document, your Chart can be **edited** and **customized** by accessing the **Chart Tools tab**. Steps to access the **Design** and **Format tabs**:
  1. Click on **your chart**. The **Chart Tools contextual tab** will appear at the top of the screen.
     a. To alter aspects of the Chart's design, click the Design tab. **(The Chart Tools – Design tab contains tools that will allow you to alter the layout of the selected chart, change colors, select and edit your data, and select from preset styles).**

INSERTING CHARTS

b. To format aspects of the SmartArt graphic, click the Format tab. **(The Chart Tools – Format tab contains tools that will allow you to add preset styles to the shape and words, arrange and position your chart within your document, and format specific areas of your chart (e.g. axis, chart title, values, legend, etc.)**

INSERTING VIDEO

Inserting Video into your Document

- This is a new feature in Word. When inserted into your document, the video will show a still image of the video.
  - When clicked, the video will open in a separate window and will play.
  - When printing out your document, the video will look like a picture.
- **Note:** To use this feature, you will need an internet connection. Videos will not play if the computer accessing the document is not connected to the internet.
- Steps to add video to your document:
  1. Click the **Insert tab**.
  2. In the **Media group**, click on the **Online Video button**.

INSERTING VIDEO

3. The **Insert Video window** will appear. A list of search options are presented.
4. In one of the **search boxes**, type a word or phrase that describes the desired video you wish to search for.
5. Press **Enter**.
6. A list of your search results will appear.
7. To preview the video, mouse over the image and click **the magnifying glass**.
8. Click the desired video you wish to add and click the Insert button.

- The video will be added to your document. It will show a still image from the video that will display in the document as a picture (this is the image that will also appear if you print the document).
- To play the video, click the play button on top of the still image.

INSERT WATERMARK

- A **Watermark** is a faded background image that displays behind the text in a document.
- It can be used to
  - indicate a document's state e.g. Confidential, Draft, etc.
  - Add a Company logo
  - Add some art
- Word offers you options to insert built-in Watermark or a Customized Watermark.

INSERT A WATERMARK

Inserting Built-in Watermark

- Open the **Design Tab**
- On the **Page Background Group**, click the **Watermark** button.
- On the **drop down** menu, click on **any of the built-in watermarks** to insert into your document.
- The watermark will be placed behind the text in your document.

INSERT A WATERMARK

Inserting Custom Watermark

- You can also create custom watermarks from text or images.
  - Select the **Custom Watermark** from the **Watermark drop down menu**
  - In the **Printed Watermark** window that opens, select **the Text Watermark** option.
  - Type the **text** you want to use into the Text box and then configure the options for **language, font, size, color and orientation** the way you want them.
  - Click **OK**
  - Your Custom Watermark will be placed behind your text in your document.
